Types of Hoses

PTFE – Ratermann Mfg. FP Family of Hoses The most popular high-pressure hose in use. Commonly found in fill plants across the country. Durable, flexible, and economically priced.

TSCZEL – Ratermann Mfg. FPZ Family of Hoses TSCZEL ETFE lined offers 75% less effusion than standard PTFE pigtails. Optional stainless steel armor casing provides additional life, safety and protection. Each assembly is tested to 1 1/2 times MAWP. Branded with MAWP, and month/year.
Not recommended for oxygen service

PTFE "Post Sintered" – Ratermann Mfg. FPT Family of Hoses The "post sintered" process re-bakes the PTFE at a controlled time and temperature, increasing the wall thickness and tightening the molecular bond of the PTFE, which dramatically reduces effusion and diffusion. Economically priced, very flexible and works well with most gases. Ideal for oxygen.

10 Year Exemption Labels for 6 & 12 Packs

Big Benefit – Due to the design you have a 10 year exemption for inspection.

Cradle ships fully assembled, comes stamped with a serial number, and is designed with open sight to the cylinder bottoms for the 5 and 10 year inspections.

Select cradles come with PE stamps and load-test certification to meet vigorous off-shore requirements.

Replacement Manifolds **Ordering Checklist**

1 Manifold Length

Measure the length of manifold from end to end.

(Please fill in Length)

2 Cradle Pack Size

- ☐ 6 Pack
☐ 12 Pack
☐ 16 Pack
☐ Other _____

(Please fill in Cradle Size)

3 Cradle Material

- ☐ Brass
☐ Stainless Steel
☐ Monel®

4 Mounting

Confirm the outside pipe diameter.

- ☐ 3/4" Standard I.D. (1-1/8" O.D.)
☐ _____
(Please fill in I.D.)

Measure diameter of outside of pipe.

| <input type="checkbox"/> Flexible Replaceable All Metal | _____ |
| <input type="checkbox"/> Other _____ | _____ |

6 Gas Type CGA

Choose type Gas Service. Manifold will be used in _____
(Please fill in Gas Type Service)

7 Brand If you see brand name of cradle _____ (Please fill in Brand Name)

OPTION – MANIFOLD

- ☐ RPV Valve Residual Pressure Valve for manifold header valve. RPV Valve keeps residual pressure in tank. The concept of a RPV Cylinder Valve is to retain a small positive pressure of gas in a gas cylinder. This prevents backflow contamination when cylinder pressure gets below the customer's system pressure and also prevent atmospheric contamination if a customer leaves the valve open when the cylinder is empty.

Stainless Steel Manifolds, 3000 PSI & 4500 PSI

Stainless Steel Manifolds

We can provide manifolds in different configurations, gases, and capacities to connect from two compressed gas cylinders up to 25 cylinders! These manifolds are manufactured to fit existing frames in use in the industry.

These manifolds have proven durability in even the harshest of environments.

NEED A CUSTOM DESIGN?

Our custom designs can meet your special requirements from oxygen service applications to highly corrosive media.

NEED TO ADD ACCESSORIES?

We can configure for additional components such a gauge or a test port to monitor pressure or gas quality & levels.

Call us for a consult today!

STAINLESS AND BRASS

6 Pack Hybrid Manifold 4500 PSI CGA 347

Made with 304 stainless steel with brass fittings and valves. Designed to maintain the durability of the stainless header and tubes while maintaining its value by utilizing brass fittings and valves.

** Also available in all stainless steel when required.*

STAINLESS STEEL

6 Pack Manifold 3000 PSI CGA 350

Constructed of 304 Stainless Steel and 3/4 inch NPT stainless valves and connectors, this manifold allows you to connect 6 cylinders at once for high volume hydrogen service applications.

STAINLESS STEEL

Orbital-welded 6 Pack Manifold 3000 PSI CGA 580

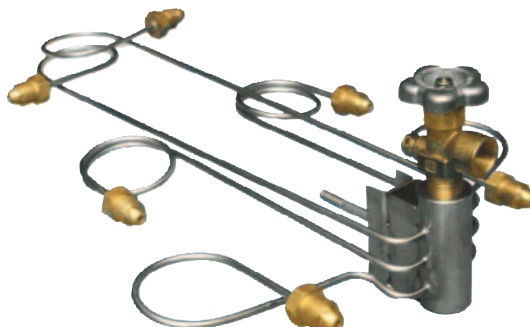

Orbital-welded and Made with 316 stainless steel throughout!

Designed to work with high purity gases. For example, consider this manifold for your high grade gas instrumental calibration.

Inquire for any Orbital-welded applications

STAINLESS STEEL

6 Pack Manifold* 3000 PSI CGA 580*

304 type stainless steel manifold with 3/4 inch NPT CGA580 Brass valves with Brass connectors to allow you to connect 6 cylinders at once for inert gas service (Nitrogen, Argon, Helium).

** Customized to fit non conforming frames. Inquire for your customization requirements.*
